

Vacancy Android Mobile Developer

32-40 hours/week

Are you an experienced Android developer and currently looking for a new challenge? Would you like to work on developing online services in a socially responsible industry? At Digidentity you're at the right address. We're looking for an android developer available to join our team immediately.

About Digidentity

Everybody should be able to identify, authenticate and authorise themselves online in a simple and secure manner. That is our mission! Digidentity develops and provides solutions for secure digital communication between individuals, companies and Governmental agencies.

For this purpose, we are continually developing new services and improving existing ones, such as 'Virtual Smartcard Technology'. This is to provide a unique digital identity of which a user keeps complete control of.

What can you expect?

- To expand the existing development team and work in 'Mobile development';
- Working on the latest technologies in the identity management sector, which are used by millions of users;
- Proactive work within a relaxing and informal office atmosphere;
- An enthusiastic development team, where you can make a difference and where we promote innovativeness. Taking responsibility and sharing knowledge are key;
- We work in agile following Scrum methodology;
- Possibilities to develop and grow within the company;
- Digidentity consists of 50 international team members. Lunch is offered and you can enjoy it together with your team. Coffee, tea, fruit and soft drinks are always available;
- An easily accessible office location, next to The Hague HS station, and travel expenses are covered;

What do we expect?

- We expect a high standard of coding, knowledge in the best practices of the used frameworks, and of course curiosity and interest in the developments within;
- You have a passion for the sector and want to share your knowledge with others;
- You are open, proactive, constructive in criticism, and have a team-player attitude;
- You feel comfortable in the strong and fast changing sector in which Digidentity operates.
- Domain knowledge is not necessary.

Knowledge and Experience

Our wish list for a new colleague.

- 4+ years of experience as an Android Mobile developer;
- Experience interacting with RESTful APIs;
- Experience with secure data storage and network layer;
- Solid knowledge of Git;
- Experience maintaining a CI environment;
- Experience with unit tests;
- Knowledge of Kotlin;
- Knowledge of architectural patterns;
- A mindset to create and maintain development documentation;
- Good understanding and knowledge of English - spoken and written.
