

## **Vacancy DevOps engineer**

*32-40 hours/week*

*Are you a real problem solver who doesn't go crazy in the process? Would you be motivated by giving DevOps more form within a young company? Do you look forward to a future where you have one online identity which gives you access to all web services? Then Digidentity is the place for you.*

### **About Digidentity**

The products at Digidentity are developed with Ruby on Rails, and deployed with Chef. All applications are running on server stacks in our own control, with the responsibility of the DevOps team.

From our DevOps colleagues we expect stability, continuity and consequences in the systems. You would be specialised in the automated testing and production of applications and servers. You would carry out these tasks on the basis of your knowledge and experience in scripting and design of scalable solutions.

The DevOps team is one of the most essential parts of the organisation, and therefore one of the most multifunctional ones. We are looking for people that we can invest in, with the intention of keeping them with us long-term.

### **What you can expect**

- A new DevOps team in which you can make a difference;
- Responsibility for the development, building, support and administration of the platform, CA and HSM's;
- Responsibility for the deployment of applications for millions of users in The Netherlands and England;
- Carrying out maintenance and improving the structure of the software;
- Setting up virtual machines;
- Challenging work in a relaxing and informal work environment;
- Potential to grow within the organisation;
- A daily lunch and friday drinks;
- An easy to reach office location (by The Hague HS Station) with train costs covered.

### **Digidentity BV**

Waldorpstraat 17p – 2521 CA Den Haag – Postbus 19148 2500 CC Den Haag – +31887 78 78 78 – [info@digidentity.com](mailto:info@digidentity.com)  
Rabobank – IBAN NL35RABO0102420173 – BIC RABONL2U – BTW NL 819696079B01 - KVK Den Haag 27322631

**What we expect**

- You have experience with the development and support of applications and servers;
- You are someone who can think with the group, and can provide advice about diverse IT solutions;
- You can work alone and within a team;
- You are open and are proactive;
- You are capable of taking control of problem solving;
- You feel comfortable in the strong and fast sector that Digidentity operates in.

**Knowledge and experience**

We would love to hear from you if you match the following criteria:

- Experience as a DevOps Engineer, Developer or Systems Administrator with all-rounder tasks;
- Solid knowledge of Chef, Jenkins, Cucumber and Git;
- Solid knowledge of Ubuntu and VMware;
- All-round knowledge of Internet technologies (DNS, mail, SSL certificates) and network configuration (VLAN);
- Knowledge of Ruby on Rails is essential;
- Good understanding of Dutch and English, written and spoken.
