

Vacancy Android/ iOS Mobile Developer

32-40 hours/week

Are you an experienced mobile developer and currently looking for a new challenge? Would you like to work on developing online services in a socially responsible industry? At Digidentity you have the right address. We would like to immediately add an Android and an iOS developer to our team.

About Digidentity

Everybody should be able to identify, authenticate and authorise him or herself online in a simple and secure manner. That is our mission! Digidentity offers possible solutions for secure digital communication between individuals, companies and Governmental agencies.

As a mobile Android or iOS developer, you will be working on the mobile applications of our products. Develop, build, release, stable implementation of the mobile applications, are your mission. You contribute with a team effort to the planning. We develop test-driven, write code for the platform to develop products for customers and endusers.

What can you expect?

- To expand the existing mobile development team and working within 'Mobile development';
- Working on the latest technologies in the identity management sector, which are used by millions of users;
- Proactive work within a relaxing and informal office atmosphere;
- An enthusiastic development team, where you can make a difference and where we promote innovativeness. Taking responsibility and sharing knowledge are key;
- We work in agile following Scrum methodology;
- Possibilities to develop and grow within the company;
- Digidentity consists of 50 international team members. Daily we gather together for lunch as a team. Coffee, tea, soft drinks are always available;
- An easily accessible office location, next door to The Hague HS station, and we reimburse OV travel expenses too.

Digidentity BV

Waldorpstraat 17p - 2521 CA Den Haag - Postbus 19148 2500 CC Den Haag - +31887 78 78 78 - info@digidentity.com

What do we expect?

- From all developers we expect coding to a high standard, knowledge in the best practices of the used frameworks, and of course curiosity and interest in the developments within;
- You have passion for the sector and want to share your knowledge with others;
- You are able to work independently and within a team;
- You are open, positive, constructive in criticism, and have a team-player attitude;
- You feel comfortable in the strong and fast changing sector in which Digidentity operates.

Knowledge and Experience required

We will welcome contact from you if you can meet these criteria:

- 4 years of experience as a Android / iOS Mobile developer;
- Experience interacting with RESTful APIs;
- Experience with secure mobile application development;
- Experience with App submission process (apps available on store are a plus);
- Solid knowledge of Git;
- Test-driven development;
- Good understanding and knowledge English languages - spoken and written.
