

## **React Front-end Developer**

36-40 hours/week

Are you energised and enthusiastic about delivering high-quality solutions to end users? Are you looking for the opportunity to grow and develop your career within a dynamic, mission focused organisation? At Digidentity you have the right address. We would like to immediately add a React Native Front-end Developer to our team. Keep reading!

### **About Digidentity**

Everybody should be able to identify, authenticate and authorise him or herself online in a simple and secure manner. That is our mission! Digidentity offers possible solutions for secure digital communication between individuals, companies and Governmental agencies. For this purpose we are continually developing new services and improving existing ones, such as 'Virtual Smartcard Technology'. This is to provide a unique digital identity of which a user keeps complete control of. Digidentity is specialised in the delivery of certificates, authentication services and digital signatures. We work on systems which are currently being used by millions of users.

### **What can you expect?**

- Joining the team will mean working in a start-up like atmosphere, but still enjoying the benefits of a bigger company;
- You will work together with software developers who are passionate about building and releasing software which makes an impact;
- Building a product means we're here for the long haul; we all share responsibility for all code;
- Expect code testing and quality reviews so we can continuously and automatically release new versions;
- You and your team are responsible for developing and improving the features of the Digidentity's eSGNG application (web and mobile);
- Challenging work in a relaxed, informal work environment;
- We work in agile following Scrum methodology;
- Possibilities to develop and grow within the company;
- Digidentity consists of 70 international team members. Daily we gather together for lunch as a team. Coffee, tea, soft drinks are always available;
- An easily accessible office location, next door to The Hague HS station, and we reimburse OV travel expenses too;

### **What do we expect?**

- An expert in JavaScript and Node.js (expert means that you have solid knowledge of the language and the environment);
- You exterminate bugs and have the perseverance to outlive ever-improving iterations of the same app;
- Is never done learning & excited about new web technologies/techniques;
- Is a team player who wants to work in an agile environment;
- Builds solid front-end architectures that integrate easily with other systems and technologies;
- You have a passion for the profession and would like to share your knowledge with others;
- You are pragmatic and solution-oriented with structuring and organising qualities;
- Digidentity operates in a strong and rapidly changing domain and you feel comfortable with it.

### **Knowledge and experience required**

- Bachelor or Master's degree;
- At least two years experience with JavaScript (like Angular, React, or other);
- At least two years experience in semantic HTML5 and CSS;
- At least two years experience building modern apps/sites in a professional environment;

- A good understanding of ReactJS implementations;
- Comfortable with Git version control;
- You are up to date with the latest developments in iOS and Android;
- If you have native iOS or Android experience, that's a big plus;
- Experience with native Node addons and C/C++ is a plus.
