

Vacancy Ruby developer

32-40 hours/week

Are you an experienced developer who is looking for a new challenge? Do you want to help work on the development of online services in a social reliable industry? As of now, we are looking for a talented individual to join our team.

About Digidentity

Everyone should have the ability to be able to safely and simply identify, authenticate and authorise him/herself online. This is our mission! Digidentity offers solutions which make safe digital communication between individuals, companies and government institutions possible. For this, we constantly develop new and improved services, such as virtual smartcard technology. These services create a unique digital identity over which the user will have complete control.

We specialise in providing certificates, authentication services, digital signatures and create software that is used by millions of users.

Job description

We develop most of our products using Ruby and Ruby on Rails. For the continued evolution of these products, we are expanding our current development teams.

We expect code of high quality, knowledge of the diverse practices of the used frameworks and a constant interest in the evolution of the framework from our experienced developers. You are well informed about the different versions of Ruby and Ruby on Rails, you follow the developments especially in the field of security and you are able to work in a team.

You have knowledge of Agile (Scrum) and test-driven development. You are comfortable with working in a quickly changing environment.

Skills & Requirements

- 2/3 or more years of experience with Ruby and/or Ruby on Rails
- Thorough knowledge of Git
- TDD / BDD
- Knowledge of SAML, PKI and cryptography are desirable
- Knowledge of DevOps practices are desirable
- Good command of Dutch and/or English, both verbal and written

Digidentity BV

Waldorpstraat 17p – 2521 CA Den Haag – Postbus 19148 2500 CC Den Haag – +31887 78 78 78 – info@digidentity.com
Rabobank – IBAN NL35RABO0102420173 – BIC RABONL2U – BTW NL 819696079B01 – KVK Den Haag 27322631

We offer

- To work on the latest technologies in the identity management industry, which is used by millions of users.
- Challenging work in a relaxed, informal work environment.
- You are part of an enthusiastic team where innovation is key and you will be able to make a difference yourself. Taking responsibility and sharing knowledge are key words in this process.
- Our young team consists of colleagues with whom we have lunch daily. Also, coffee, tea and soft drinks are at your disposal.
- It is possible to advance within the organisation.
- We do our work on iMacs. You can use your favourite editor, as long as you commit your code with Git. We work Agile according to the Scrum-method.
- Easily reachable located near the train station The Hague HS, with public transport compensation.
