

Vacancy Test Engineer

40 hours/week

Are you an experienced software tester, with strong communication skills and a hands-on mentality? Are you stress resistant? Would you like the opportunity to work in a young dynamic organization? As of now, we are looking for a motivated individual to join our team.

About Digidentity

Everybody should be able to identify, authenticate and authorize themselves online in a simple and secure manner. That is our mission! Digidentity develops and provides solutions for secure digital communication between individuals, companies and Governmental agencies.

For this purpose, we are continually developing new services and improving existing ones, such as 'Virtual Smartcard Technology'. This is to provide a unique digital identity, which a user keeps complete control of.

Digidentity is specialized in the delivery of certificates, authentication services and digital signatures. We work on systems which are currently being used by millions of users.

What can you expect?

- To expand the existing testing team and work in 'Test-driven Development';
- Working on the latest technologies in the identity management sector, which are used by millions of users;
- Proactive work within a relaxing and informal office atmosphere;
- An enthusiastic development team, where you can make a difference and where we promote innovativeness. Taking responsibility and sharing knowledge are key;
- We work Agile, following the Scrum framework;
- Possibilities to develop and grow within the company;
Digidentity consists of 50 international team members. Lunch is offered, and you can enjoy it together with your team. Coffee, tea, fruit and soft drinks are always available;
- An easily accessible office location, next to The Hague HS station, and travel expenses are covered.

What do we expect?

As a test engineer you are responsible for development, maintaining and improve automated tests. This will be for both web and mobile applications (Android / iOS/ Windows).

- Support the project teams with testing;
- Develop automated tests;
- Maintaining the acceptance suite;
- Carry out regression tests;
- Report and document test results.

Knowledge and Experience

Our wish list for a new colleague.

- You have automation framework experience with hand coded tests;
- You have knowledge of Agile (Scrum) and test-driven development;
- You feel comfortable in the strong and fast changing sector in which Digidentity operates;
- You have strong analytic skills, accuracy and a positive attitude;
- You are self-assertive, work well individually and are also able to work well in a team;
- Good understanding of English, both verbal and written.
